

# 1 Pairing with your device

On first use, it is essential to pair your Kuzo FS2 smartwatch with your mobile device. Only when paired with the Veho Kuzo app will the Kuzo FS2 function as a smartwatch.

1. Using your device, scan the QR code displayed on your Kuzo F2-S watch screen.
2. Your device will automatically be directed to the App Store or Google Play Store. Install the 'Veho Kuzo' App.
3. Open the app, enter your email address, and input a 6–20-character password. Confirm this password, read and agree to the user and privacy policies, then select 'Register and log in' to proceed.
4. Complete the personal information fields and select 'Finish' to complete your account. Providing accurate information will allow for the most accurate data.

5. Swipe through the user guide pages and select 'Finish' to enter the app.
6. Select the 'Device' tab then click 'Add device'.
7. Select 'Veho Kuzo F2-S' from the drop-down list, then press the green tick on the watch to confirm the pairing.
8. Select a device language, and select 'Confirm' to proceed.

If a notification appears requesting permission to connect to the watch, press 'Allow'. If a Bluetooth pairing request appears press 'Pair' to connect devices. **Note:** If the smartwatch was previously paired to the device, it must first be forgotten from Bluetooth settings.
